Description of work: _____

Total Cost of Work _____

All new & reconstructed driveways will be reviewed by Public Works for culvert Requirements, if any. Do not change elevation from existing.
Submit Plat of Survey showing the proposed location and dimensions of driveway improvement. 25' maximum width at public right-of-way.
Driveway must maintain 5' from side property lines. Minimum of 6" of concrete required in right-of-way for public walk & driveway.
Minimum 4" concrete required on private property. Minimum 4" compacted granular base required for all concrete. B-Box cannot be located in concrete.
Two inspections are required for asphalt and concrete. You need to call the building department 708-923-7507 for the driveway inspections and a 24 hour Notice is Required.

Culvert Required _____

Culvert Not Required _____

If a culvert is needed you must contact Public Works at 708-259-5724. A 72 hour notice is required to set the elevations. The village ordinance requires the culvert to have end sections.
