#### Independent Auditor's Report

To the Honorable President and Members of the Board of Trustees Village of Worth, Illinois

We have audited the accompanying general purpose financial statements of the Village of Worth, Illinois, as of and for the year ended April 30, 2003. These general purpose financial statements are the responsibility of the Village's management. Our responsibility is to express an opinion on these general-purpose financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The general purpose financial statements referred to above do not include the general fixed assets account group which should be included in order to conform with accounting principles generally accepted in the United States of America. As described in Note 1 to the financial statements, the Village does not maintain historical cost basis records of its general fixed assets and, therefore, the amount that should be recorded in the general fixed asset account group is not known.

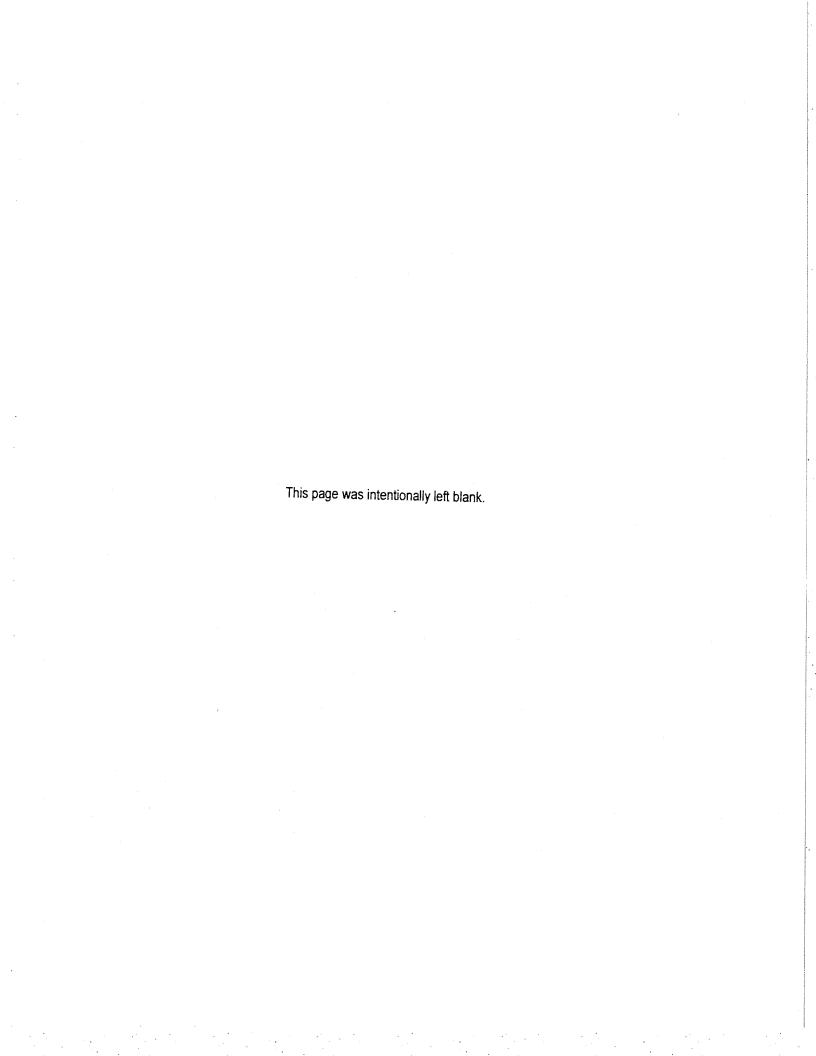

The Village does not disclose the actuarial information as required by accounting principles generally accepted in the United States of America for the Police and Firefighters' Pension Funds. The actuarial information that the Village discloses is provided by the State of Illinois Department of Insurance and does not comply with accounting principles generally accepted in the United States of America.

In our opinion, except for the effect on the financial statements of the omission described in the third paragraph and the omission of the actuarial disclosures required for the Police and Firefighters' Pension Funds, the general purpose financial statements referred to above present fairly, in all material respects, the financial position of the Village of Worth, Illinois, as of April 30, 2003, and the results of its operations and the cash flows of its enterprise funds for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Our audit was made for the purpose of forming an opinion on the general purpose financial statements taken as a whole. The combining and individual fund financial statements and other schedules, listed in the table of contents as supplementary information, are presented for the purpose of additional analysis and are not a required part of the general purpose financial statements of the Village of Worth, Illinois. Such information, except for the information required by revenue bond ordinance on pages 56 and 57 which is marked unaudited and on which we express no opinion, has been subjected to the auditing procedures applied in the audit of the general purpose financial statements and, in our opinion, is fairly presented in all material respects in relation to the general purpose financial statements taken as a whole.

McHadrey of Pullen, LCP

#### **Notes To Financial Statements**

### Note 1. Financial Reporting Entity and Summary of Significant Accounting Policies

<u>Nature of Activities</u>: The Village of Worth, Illinois provides various municipal services to its residents. These services include police protection, fire protection, paramedic services, water and sewer systems, public works operations, road and bridge maintenance and general administration.

<u>Financial Reporting Entity</u>: Generally accepted accounting principles require that the financial reporting entity include (1) the primary government, (2) organizations for which the primary government is financially accountable and (3) other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the financial reporting entity's financial statements to be misleading or incomplete. Based on this criteria, there are no potential component units whose financial data should be combined with and included in the general-purpose financial statements of the Village, nor is the Village considered to be a potential component unit of any other governmental unit.

<u>Description of Funds and Account Groups</u>: The accounts of the Village are organized on the basis of funds and account groups, each of which is considered a separate accounting entity. Government resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled. The various funds and account groups are combined and summarized in these financial statements as follows:

Governmental Fund Types: Governmental funds are funds through which most of the Village's governmental functions are financed. The acquisition, use and balances of the Village's expendable financial resources, except those accounted for in the proprietary funds, are accounted for in the governmental funds. The measurement focus is on determination of financial position and changes in financial position. The following are the Village's governmental funds.

General Fund - is the general operating fund of the Village and is used to account for all financial resources except those required to be accounted for in another fund.

Special Revenue Funds - are used to account for the revenues derived from specific sources. These resources are utilized to finance expenditures legally restricted for specified purposes.

Debt Service Funds - are used to account for the servicing of general long-term debt not being financed by proprietary funds.

Capital Projects Funds - are used to account for resources used for the acquisition or construction of major capital facilities.

<u>Proprietary Fund Types</u>: Proprietary funds account for the Village's ongoing activities which are similar to those often found in the private sector. The measurement focus is upon determination of net income. The enterprise funds are the proprietary fund types of the Village.
